

# DIGITAL MAILROOM SOLUTION

IRISXTRACT™ THE CONTENT TO PROCESS PLATFORM

# DIGITAL MAILROOM SOLUTION

## IRISXTRACT™

Flexible & scalable solution-platform

Cloud-Ready Technologies

100% Intellectual Property for independent and flexible partnerships

Flexible pricing models: Licensing, subscription, transactional

*Already more than 5000 customers from all continents trust IRIS Intelligent Document Recognition (IDR) solutions.*

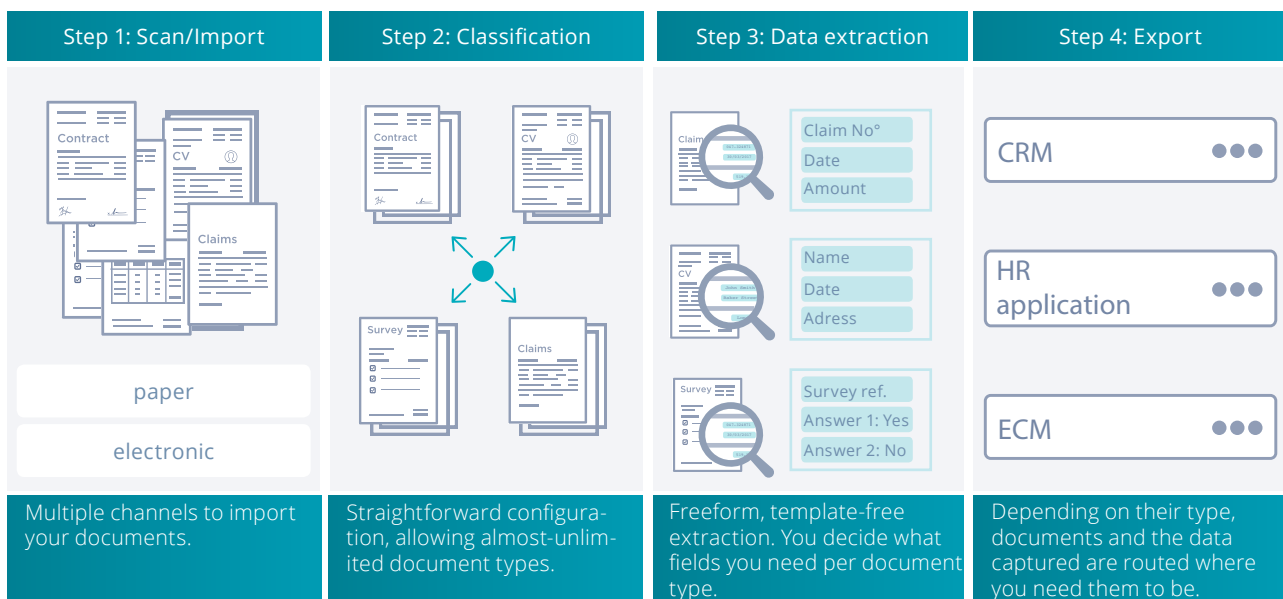

## OPTIMIZE YOUR BUSINESS PROCESSES

All organizations receive tons of paper and electronic documents of all types. Collecting and processing them is time consuming and resource intensive.

The IRISxtract™ Digital Mailroom (DMR) solution is a fully scalable and modular platform that **automatically classifies** all types of incoming documents, **extracts key data** and routes it to the right recipient, using the relevant business process application. Your documents and the data captured are made available in your company's system, for fast and easy access.

The DMR solution processes both **paper and electronic** documents. Paper documents are scanned right into IRISxtract™ using a dedicated version of IRIS Powerscan™. Documents can be separated either manually by scanning operators using separators like barcodes or automatically using the **Intelligent Document Separation** feature. Electronic documents are automatically imported from watched folders, cloud repositories, email...

Document classification and data extraction are the first steps of any efficient business process optimization. Documents are classified by type using the **self-learning XClassify** technology while relevant data is immediately captured and transferred to subsequent record and case management applications. The DMR Solution can process complex and **high volume** documents of any type and from any source. The Verify user interface is available in German, English, Spanish, French, Italian, Hungarian, Dutch, Norwegian, Portuguese and Russian. The OCR settings to process Asian, Arabic or Cyrillic character sets can be easily switched.

## DIGITAL MAILROOM SOLUTION: AN UN-MATCHED SET OF FEATURES

- ✓ **A unique classification concept** – IRISXtract™ combines three different classification mechanisms to ensure the highest performance possible: a rule-based classification, a statistical analysis and a geometric pattern matching.
- ✓ **Self-learning classification setup** - With XClassify you configure an extensive classification scenario in just a few clicks. Whatever the number of document types, you just have to feed IRISXtract™ with a few sample documents of each type, the system will do the rest and trains itself automatically.
- ✓ **High extraction performance** - The IRIS-made Optical Character Recognition (OCR) engine, iDRS, guarantees the highest extraction performance possible.
- ✓ **Free-form and template-based extraction** - Our solution captures both structured and unstructured documents. Data extraction rules are based on the document type defined during the classification step.
- ✓ **Database lookups** - The solution can use your reference data to improve the classification and the extraction quality.
- ✓ **Easy integration into your systems** - Based on their type and content, documents and the data captured are routed to the right business processes for a fast and easy access.

## DOCUMENT CLASSIFICATION AND DATA EXTRACTION MADE EASY WITH A WORLD OF CUSTOMIZATION POSSIBILITIES

The DMR solution includes a broad range of configurable options to address your organizational requirements. It is equipped with powerful mechanisms like an **integrated benchmark environment, built-in checking methods**, various **statistical analyses** and a closed workflow loop, particularly powerful to ramp-up an application.

The classification and data extraction process can be adapted with built-in **Microsoft Visual Studio Tools for Applications (VSTA)**, where specific business and validation rules can be configured efficiently.

Years of experience and customer feedback have contributed to the IRISXtract™ DMR solution, an outstanding software that helps organizations save money and time in their journey to optimize processes and data quality.

### YOUR BENEFITS

-  Improved responsiveness and business processes
-  Work faster and smarter
-  Improved customer and supplier satisfaction
-  More control on information flow
-  Increased employee productivity

“ We chose I.R.I.S. for their excellent classification results, transparency, speed, and the usability of XClassify. ”

- Henri Koks, Analyst CZ -

## ABOUT US

Image Recognition Integrated Systems (IRIS) is a leading provider of 'Content to Process' technologies'. IRIS offers solutions for automatic invoice and order processing, HR and supplier records as well as case management in legal, healthcare, and finance sectors.

IRIS provides technologies and solutions that capture data and information contained in documents, which are relevant to business processes. The goal is to make the data easily available while reducing operating costs.
