

DELIVERY ORDER MANAGEMENT

PROCESS AUTOMATION FOR LOGISTICS COMPANIES BY INTELLIGENT DATA RECOGNITION

FACTS

PARTNER/CUSTOMER

- noeske netsolutions / eds TRANSPORT - LOGISTIK

IRIS TECHNOLOGY

- IRISXtract™ for Documents

THE SOLUTION

- eds is a logistics company that needs to extract data from the delivery orders they receive from their clients in order to feed their delivery management system: WinSped.
- eds receives the delivery orders as PDF files attached to e-mails. Each PDF can consist of more than one multi-page delivery order. After importing the documents via XMailFetcher, the PDF is automatically separated into distinct delivery orders in IRISXtract™.
- The files are then tagged with metadata, verified and exported for further processing in WinSped.
- Through the hybrid forms capturing technology, metadata is identified and validated automatically based on business rules. This metadata includes e.g. point of sale (delivery address), document number, delivery date, total gross weight, total net weight, total number of boxes.

BENEFITS

- Automation has enabled eds to save time and money, and to assure that the SLAs they have with their customers are met.
- IRIS' transactional pricing model is tailor-made for transport companies such as eds. It allows them to renew their license on an periodical basis, according to the contract run-time with their customers and in line with their investment policy.
- In the meantime, eds is looking into further expanding the solution roll-out for other delivery management scenarios and enriching the existing solution with new features, such as line item search and processing of hand-written text.

KEY FACTS:

- Up to 90.000 images processed annually.
- Reducing processing time by over 90%.
- Increasing process quality by over 25%.

EDS TRANSPORT - LOGISTIK:

“eds – TRANSPORT - LOGISTIK offers since more than 30 years reliable, pan-European transport and logistics services. We focus on the continuous improvement of process quality and efficiency. IRISXtract™ grants to achieve these objectives through cutting edge intelligent delivery records processing and automated data capture technology by safeguarding customer SLAs and reducing process costs significantly.”

Walter Pahl, General Manager,
eds TRANSPORT - LOGISTIK GmbH

ABOUT US

Image Recognition Integrated Systems (IRIS) is a leading provider of 'Content to Process' technologies'. IRIS offers solutions for automatic invoice and order processing, HR and supplier records as well as case management in legal, healthcare, and finance sectors.

IRIS provides technologies and solutions that capture data and information contained in documents, which are relevant to business processes. The goal is to make the data easily available while reducing operating costs.
