

INTELLIGENT ENTRY AUTOMATION INTO LASERFICHE® & LASERFICHE® CLOUD

TAKE YOUR **LASERFICHE®** ECM SOLUTION TO THE NEXT LEVEL WITH **IRISXTRACT™**

Intelligent Content Management starts with state-of-the-art document recognition and data capture. All organizations receive tons of paper and electronic documents of all types. Collecting and processing them properly is time consuming and resource intensive. This is where IRISXtract™ comes into play. It provides intelligent entry automation into your Laserfiche® environment.

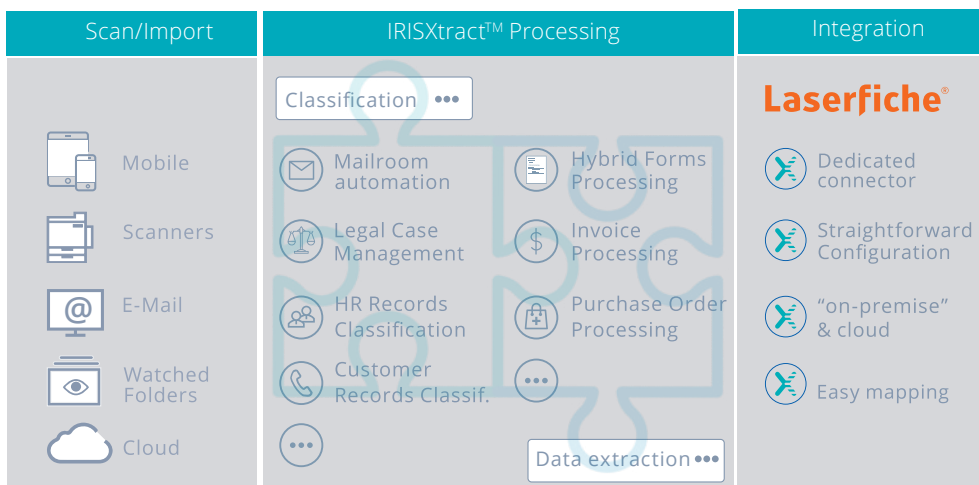

IRISXTRACT™ - AUTOMATIC DOCUMENT CLASSIFICATION & DATA EXTRACTION

IRISxtract™ is an innovative document capture platform powered by an **AI-based document classification engine**. It's data extraction approach is based on a **free-form** (template free), and **full-text approach** allowing IRISxtract™ to understand a document the same way a human would (including documents it has not seen before).

With its dedicated connector for **Laserfiche®**, IRISxtract™ will improve your current process of onboarding and routing documents, extracting key data accurately into Laserfiche®.

LASERFICHE® - INTELLIGENT CONTENT MANAGEMENT

The **Laserfiche™ ECM platform** helps organizations automate document-driven processes, allowing the right people to access the right information at the right time. In particular, these processes include: secure document storage, granular document security, Full-text search and retrieval.

- ✓ **Field Mappings:** Provides metadata list details from Laserfiche® as selectable mapping options inside IRISConnect™. This option allows users the opportunity to select specific list options and even insert the rule into any number of intelligent conditions.
- ✓ **Intelligent Conditions:** IRISConnect™ offers the ability to dynamically apply your business rules to direct your information intelligently to the corresponding field mappings, folders and file creations based on a variety of options.

- ✓ **File Options:** Create files using overwrite options such as Never, Ignore, Rename, Update, or Replace
- ✓ **Multi-Value Indexing:** Pass multiple values into a single field inside Laserfiche®.
- ✓ **Intelli-Tags:** Add tags to any data or files delivered into Laserfiche®.

SEAMLESS INTEGRATION OF IRISXTRACT™ INTO LASERFICHE® WITH IRISCONNECT™

IRISConnect™ is a singular and stand-alone framework to connect any IRIS product/solution to a wide range of third-party ECM and CRM systems, both in on-premise and cloud deployment. It allows you to export the documents you process with your IRIS solutions – including the indexes you assign to them – to the destination of your choice.

The **Laserfiche®** connector is a dedicated connector allowing a seamless integration between IRISxtract™ and Laserfiche®, both on-premise & Cloud versions.

IRISCONNECT™ FEATURES & BENEFITS

- ✓ **PDF Options:** PDF creation comes with all Standard PDF options or Compressed PDF (up to 50x smaller) capabilities using IRIS patented iHQC compression.
- ✓ **Multi-Culture Text Layers:** PDFs can include up to 4 Languages (as text layers) inside each PDF created in Laserfiche®.

- ✓ **Path Navigation:** Map import entry paths into Laserfiche® by browsing anywhere inside your Laserfiche Repositories.
- ✓ **Folder/File Naming:** Customize Folder(or Subfolder)/File names inside Laserfiche®, based on any combination of IRIS Captured Values, User Tokens, Condition Rules, and much more...
- ✓ **Templates:** Write Metadata to any pre-existing Template.
